ELSEVIER

Operations Research Letters 23 (1998) 185–186

operations research letters

Author Index to Volume 23

The issue number is given in front of the page numbers

Aneja, Y.P., see Sokkalingam, P.T. (1–2) 27– 33

Benli, Ö.S., see Şen, A. (3–5) 135–142

Catalano, M.S.F., see Esposito, A. (3–5) 99–107
Chakravarti, N. and A.P.M. Wagelmans, Calculation of stability radii for combinatorial optimization problems (1–2) 1–7
Chen, H. and H. Zhang, Diffusion approximations for Kumar–Seidman network under a priority service discipline (3–5) 171–181
Cheng, E., Separating subdivision of bicycle wheel inequalities over cut polytopes (1–2) 13– 19
Churilov, L., D. Ralph and M. Sniedovich, A note on composite concave quadratic programming (3–5) 165–169
Coelli, T., A multi-stage methodology for the solution of orientated DEA models (3–5) 143–149

Dahl, G., The 2-hop spanning tree problem (1–2) 21– 26
Du, D., see Wen, J. (3–5) 113–116

Esposito, A., M.S.F. Catalano, F. Malucelli and L. Tarricone, A new matrix bandwidth reduction algorithm (3–5) 99–107

Fleischer, L. and É. Tardos, Efficient continuous-time dynamic network flow algorithms (3–5) 71– 80
Fukushima, M., see Kanzow, C. (1–2) 45– 51

He, B. and H. Yang, Some convergence properties of a method of multipliers for linearly constrained monotone variational inequalities (3–5) 151–161

Jia, C., Minimizing variation in stochastic flow shop (3–5) 109–111
Jiang, J., A long-step primal–dual path-following method for semidefinite programming (1–2) 53– 61

Kanzow, C. and M. Fukushima, Solving box constrained variational inequalities by using the natural residual with D-gap function globalization (1–2) 45– 51
Klabjan, D., G.L. Nemhauser and C. Tovey, The complexity of cover inequality separation (1–2) 35– 40
Kolen, A.W.J., see Koster, A.M.C.A. (3–5) 89– 97
Koster, A.M.C.A., S.P.M. van Hoesel and A.W.J. Kolen, The partial constraint satisfaction problem: Facets and lifting theorems (3–5) 89– 97

Malucelli, F., see Esposito, A. (3–5) 99–107
Meller, R.D., V. Narayanan and P.H. Vance, Optimal facility layout design (3–5) 117–127

Narayanan, V., see Meller, R.D. (3–5) 117–127
Nemhauser, G.L., see Klabjan, D. (1–2) 35– 40

Ralph, D., see Churilov, L. (3–5) 165–169

Elsevier Science B.V.

Schuurman, P., A fully polynomial approximation scheme for a scheduling problem with intree-type precedence delays	(1–2)	9– 11
Şen, A. and Ö.S. Benli, Lot streaming in open shops	(3–5)	135–142
Sherman, M., Batch variance estimators for the median of simulation output	(3–5)	129–134
Sniedovich, M., see Churilov, L.	(3–5)	165–169
Sokkalingam, P.T. and Y.P. Aneja, Lexicographic bottleneck combinatorial problems	(1–2)	27– 33
Song, W.T. and C.-C. Su, A three-class variance swapping technique for simulation experiments	(1–2)	63– 70
Su, C.-C., see Song, W.T.	(1–2)	63– 70
Tardos, É., see Fleischer, L.	(3–5)	71– 80
Tarricone, L., see Esposito, A.	(3–5)	99–107
Tovey, C., see Klabjan, D.	(1–2)	35– 40
van Hoesel, S.P.M., see Koster, A.M.C.A.	(3–5)	89– 97
van Maaren, H., see Warners, J.P.	(3–5)	81– 88
Vance, P.H., see Meller, R.D.	(3–5)	117–127
Wagelmans, A.P.M., see Chakravarti, N.	(1–2)	1– 7
Warners, J.P. and H. van Maaren, A two-phase algorithm for solving a class of hard satisfiability problems	(3–5)	81– 88
Wen, J. and D. Du, Preemptive on-line scheduling for two uniform processors	(3–5)	113–116
Woeginger, G.J., A comment on a minmax location problem	(1–2)	41– 43
Yang, H., see He, B.	(3–5)	151–161
Zhang, H., see Chen, H.	(3–5)	171–181
